

PROMOTE STUDY

PROMOTE is a collaboration to **P**romote **R**ural Health **O**pportunities thru **M**arshall University **T**eam **E**fforts

- The purpose of **PROMOTE** is to improve diabetes control for individuals in medically underserved communities.
- One initiative of **PROMOTE** is to provide individuals with intensive diabetes focused care. Individual are referred by their primary care physician when their A1c is greater than 8.5%; LDL cholesterol is greater than 130; or BP is higher than 140/90
- Individuals seen in this study receive diabetes focused visits and follow up from a nurse practitioner who is also a certified diabetes educator to achieve standard goals established by the American Diabetes Association.

For information about the **PROMOTE** study, please contact
Dr. Tipu Saleem at (304) 691-1000 or Anise Nash at 304 691-1660
